## Spongeball Billy Press Kit

BadComics Software has created an app for the Apple App Store and the Google Play Store called Spongeball Billy, for US release on August 10, 2019.

The Spongeball Billy character is the creation of Tom Pavia. Spongeball Billy is a magic Spongeball, used by magicians, that has come to life. Billy and the Boy that found him find adventures from learning to ride a bike, to imagining going to Mars. They are great short stories written by Paul Nelson, adapted to electronic format and illustrated by Therese Camstinio.

Tom reached out to BadComics Software to work on an app or game to help Spongeball Billy to reach more people. What came out of this collaboration was to use stories that Tom had about adventures that Spongeball Billy had, mix with a coloring book type app and educational games for children. Tom will be releasing in the near future a physical version of a coloring book to go with the app. The app comes with three short stories, nine coloring pages from the stories and 3 educational activities/games, all for free! There is even an achievement board to show how good you are at the activities/games. No information or data is ever sent to the developer so your information is safe.

Also, for in-app purchase, there are three additional stories, nine additional coloring pages and three more activity/games doubling the fun, all for a very small price!

For the future, plans to expand the world of Spongeball Billy with additional stories and games are in the works. They may be added as in-app purchases or as a separate app.
